### PROFESSIONAL EXPERIENCE

Mr. Levine is currently a part-time Geologist and Project Manager at **Harper Environmental Associates, Inc (HEA)**. He has over 29 years of experience in the environmental industry and has managed environmental site assessment and remediation projects throughout the United States. His primary responsibilities at HEA include completion of Phase I ESA and Phase II Site Investigations; Soil and Groundwater sampling; customer and project management.

Mr. Levine was employed by Groundwater Technology, Inc. for 10 years, most recently as the Director of Sales and Marketing, ORS Environmental Systems and Regional Sales Manager, Groundwater Technology, 1986 to 1996. He was responsible for all facets of business development at ORS. Devised, trained and implemented all strategic marketing plans.

- Directly managed field sales staff, marketing and sales coordinators and factory sales group for domestic and international sales;
  - Responsible as personal account manager for large national and international customers;
  - Coordinated all trade shows, marketing studies and advertising;
  - Coordinated field service technicians and repair department.
- 
- Prior to joining HEA, Mr. Levine was employed as an independent environmental consultant in the Northeast states, and as a geologist at Tooke Engineering. He was responsible for the operations, training, customer service and staffing of geological consultants and well logging, operating throughout the Rocky Mt. and Mid-Continent areas.
